Product Name	CITY LIGHTS	
Construction	Hand woven	
Product description	Random tip sheer	
Suitability	Heavy domestic / Medium contract	
Gauge or pitch	31 / 10 cm	
Stitch state or rows	22 / 10 cm	
Tuft density	68,200 /m ²	
Pile height above backing	10-11mm	
Total pile weight	2,700g/m ²	
Total carpet weight	4,035g/m ²	
Pile fibre content	80% New Zealand wool and 20% British Wool	
Backing materials	Cotton	
Widths available	5m	
Colour fastness:	4	
• Light		
• Shampoo		
Abrasion resistance	In access of 25,000 rubs	
Moth proofing	On application	
De-lamination force	On application	
(Bonding Strength) ASTM D3936		
Tuft withdrawal force: ISO 4919	On application	
Tog rating	2.41	
Flammability ratings: BS 4790 & BS 5287 hot metal nut test	Low radius effect of ignition	
Stock range colour references:	471 Vegas Grey 472 London Smoke 473 Shanghai Shale 474 Tokyo Taupe 475 Boston Beige 476 New York 477 Sydney Sand	

City Lights is a deliciously deep pile hand woven, random tip sheer carpet made from pure New Zealand and British plain dyed wool, in three ply yarn. Suited to luxury flat areas such as lounge and bedrooms.

All the above specifications are subject to normal manufacturing variations.

The company may make changes or improvements to products at anytime without notice.

Batch to Batch Colour Matching: Whilst every effort is made to ensure that the colours are matched as accurately as possible from one batch to another, an exact match, particularly with natural undyed wools, cannot be guaranteed. If you wish to have an exact colour, please request a dye batch cutting from your authorised dealers before ordering stock.

Heathered Carpets: Heathered carpets are created using random blends of colour, resulting in coloured flecks which are a natural feature of a heathered carpet. The blending process may also result in some linearity which is not always visible on samples and, again, is an inherent design of this type of carpet and not considered a manufacturing fault.

Hand woven Carpets: Hand woven carpets are an artisan product and, as such, can have irregularities and imperfections within the carpet. No two carpets will be identical, unlike mass produced, machine carpet. Any irregularities found within a hand woven carpet are to be celebrated and not considered a manufacturing fault.

Shading: Carpets may develop light and dark shaded areas, particularly in heavy traffic areas, this is called 'shading' and is caused by pile pressure. This is not considered to be a manufacturing defect and can occur on most textiles.

Installation Riviera Home UK carpets should always be sold and professionally installed in full accordance with BS:5325, using a good quality underlay.

Care & Maintenance: If installed and maintained correctly, your carpet should give you years of good service. We recommend that spillages are spot cleaned immediately and that you use a professional cleaning contractor to look after your carpets.
