

Product Name	QUANTUM		
Construction	Hand woven		
Product description	Random tip shear		
Suitability	Heavy domestic / Medium contract		
Gauge or pitch	55.12 / 10cm		
Stitch state or rows	54 / 10cm		
Tuft density	297,648 /m ²		
Pile height above backing	5mm		
Total pile weight	1,750 /m ²		
Total carpet weight	2,852 /m ²		
Pile fibre content	100% Nylon		
Backing materials	Cotton		
Widths available	5m		
Colour fastness:			
• Light	5		
• Shampoo	4-5		
Abrasion resistance	In access of 25,000 rubs		
Moth proofing	N/A - Naturally moth resistant		
De-lamination force (Bonding Strength) ASTM D3936	8.96 lbs/inch		
Tuft withdrawal force: ISO 4919	2.69 lbs/inch		
Tog rating	1.1011		
Flammability ratings: BS 4790 & BS 5287 hot metal nut test	Low radius effect of ignition		
Stock range colour references:	570 Wistful Dove 571 Soft Truffle 572 Silver Light 573 Urban Chic	574 Storm 575 Ocean Jewel 576 Denim 577 Airforce Blue	578 Black Ash 579 Purple Rhapsody

A hand woven random velvety tip shear, that will withstand heavy traffic, is practical enough for family life, and available in 10 sophisticated shades.

All the above specifications are subject to normal manufacturing variations.

The company may make changes or improvements to products at anytime without notice.

Batch to Batch Colour Matching: Whilst every effort is made to ensure that the colours are matched as accurately as possible from one batch to another, an exact match, particularly with natural undyed wools, cannot be guaranteed. If you wish to have an exact colour, please request a dye batch cutting from your authorised dealers before ordering stock.

Heathered Carpets: Heathered carpets are created using random blends of colour, resulting in coloured flecks which are a natural feature of a heathered carpet. The blending process may also result in some linearity which is not always visible on samples and, again, is an inherent design of this type of carpet and not considered a manufacturing fault.

Hand woven Carpets: Hand woven carpets are an artisan product and, as such, can have irregularities and imperfections within the carpet. No two carpets will be identical, unlike mass produced, machine carpet. Any irregularities found within a hand woven carpet are to be celebrated and not considered a manufacturing fault.

Shading: Carpets may develop light and dark shaded areas, particularly in heavy traffic areas, this is called 'shading' and is caused by pile pressure. This is not considered to be a manufacturing defect and can occur on most textiles.

Installation Riviera Home UK carpets should always be sold and professionally installed in full accordance with BS:5325, using a good quality underlay.

Care & Maintenance: If installed and maintained correctly, your carpet should give you years of good service. We recommend that spillages are spot cleaned immediately and that you use a professional cleaning contractor to look after your carpets.
